#### **Data Flow Diagrams:**

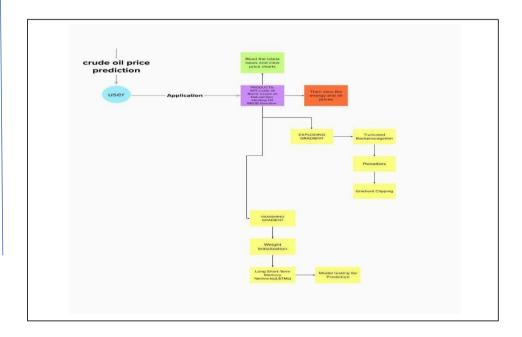

The classic visual representation of how information moves through a system is a data flow diagram (DFD). A tidy and understandable DFD can graphically represent the appropriate quantity of the system demand. It demonstrates how information enters and exits the system, what modifies the data, and where information is kept.

### **Example:** (Simplified)

## Flow

- User configures credentials for the Watson Natural Language Understanding service and starts the app.
- 2. User selects data file to process and load.
- 3. Apache Tika extracts text from the data file.
- 4. Extracted text is passed to Watson NLU for enrichment.
- 5. Enriched data is visualized in the UI using the D3.js library.

## **User Stories**

Use the below template to list all the user stories for the product.

| User Type                  | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria                            | Priority | Release  |
|----------------------------|-------------------------------------|----------------------|---|--|----------|----------|
| Customer<br>(Mobile user)  | Application                         | USN-1                | You can download the crude oil price by opening the Google Play Store app directly as a user.   | I can access own decisions.                    | High     | Sprint-1 |
|                            | Available<br>Products               | USN-2                | Users of the application may instantly update the energy and oil prices while using it because there are so many different products in the crude oil price app. | I can receive the data once click then confirm | High     | Sprint-1 |
|                            | Additional<br>Features              | USN-3                | Users can read the most recent news and see oil price charts.  Major Energy Quotes User View The user may use many colour schemes.                              | I can view then read the price prediction.     | High     | Sprint-2 |
|                            | Expectations                        | USN-4                | User Can Convert Currency And Exchange Rates  | I can expect                                   | Medium   | Sprint-1 |
|                            | Login                               | USN-5                | Log in as a user without using your email address, username, or password.   |  | High     | Sprint-1 |
| Customer (Web              |                                     |                      | I can see the price of crude oil as a consumer.   | I can view the price directly                  | High     | Sprint-1 |
| Customer Care<br>Executive |                                     |                      | I am the user and I executive the pricing history.  | I can accept the terms                         | medium   | Sprint-1 |
| Administrator              |                                     |                      | As a manager, it anticipates the results.   | Show the result                                | High     | Sprint-1 |
|                            |                                     |                      |   |  |          |          |
